

## NEWS & UPDATES

### BEACH RENOURISHMENT UPDATE 10/29/2021:

Due to rough surf conditions over the past two days, the beach renourishment has come to a standstill. Equipment is still staged behind Majestic Beach Resort. We are hopeful that the weather will improve over the next couple of days in order for crews to continue. A bright side, is that the new sand has also included new seashells. There were numerous folks on the beach this morning collecting new souvenirs. Below are the project website, as well as the updated project map. The latest update has Section G, which is from Ocean Towers to Shores of Panama, including Majestic Beach Resort, now completing by November 6th.

### BEACH RENOURISHMENT UPDATE 10/26/2021:

Today crews are working full steam ahead. These photos are from this morning, directly behind Tower 1 and Tower 2. Barring any delays, they will

continue to work west for a couple more days and they move east of Majestic. Hopefully, by weeks end, we will have a portion of our beach back open.

## **BEACH RENOURISHMENT PROJECT UPDATE 10/25/2021:**

Dear Majestic Owners-

The beach renourishment project continues to progress. This crews are mobilizing behind Majestic Beach Resort. We were informed this morning that what equipment is being staged and pipe brought in for our section of beach, that the beach will be closed for safety precautions. They expect the beach will reopen by Thursday. However, please keep in mind, crews will still be working in our area afterwards. According to the newly released schedule, our project phase, which goes east to Shores of Panama is now scheduled to go through November 1st. As they work through the section of the beach behind Majestic, they will begin to reopen the beach for Gulf access. Below is are some photos of the section to the west that is being worked on now, as well as the equipment staged behind Majestic. Additionally, below is the link to the project website and the updated project map.

Sincerely,

Paul Shamblin, CMCA, AMS  
Association Manager  
Majestic Beach Resort Community Association, Inc.

## IMPORTANT BEACH RENOURISHMENT PROJECT UPDATE:

In May we reported that the 2021 Beach Renourishment Project was scheduled to begin in September 2021. The portion of the project which includes Majestic Beach Resort was originally scheduled to take place in December 2021. However, this week we received news that Project Officials have added a second dredge and will begin the eastern portion of the project in October. **The portion of the beach stretching from Ocean Towers to Shores of Panama, including Majestic Beach Resort, will now take place between October 20th and November 1st.** The entire project, which is scheduled to be completed by Spring of 2022, is slated to include areas between St. Andrews State Park and Ocean Towers, as well as the City Pier and Pinnacle Port. The TDC has provided a Q&A informational notice related to the project. Please click the buttons below for the Beach Renourishment website and project map. This is exciting news for Majestic Beach Resort. Over the past 3 years, we have easily lost approximately 1/2 - 2/3 of the depth of our beach.
